Buyers Guide

Artificial Grass Introduction

Synthetic grass are otherwise known as artificial grass, they are kind of surface planned to look like natural grass. Even though it possesses a natural look, it is produced solely using original synthetic material. Such artificial grass as well has a tendency to be stronger than natural grass. By tradition, synthetic grass are been used in sports areas and field where natural grass becomes quite difficult to maintain, mainly in indoor areas.

The enhancement in the appearance and experience of synthetic grass has added chiefly to its bigger use for the housing turf and lawns. By making use of synthetic grass, homeowners could take pleasure in the gaze of a fit, green, ideally maintained lawn all through the year. Moreover, synthetic grass also needs smallest protection and maintenance, making it far handier and less expensive to keep than the natural grass.

We've compiled a list of artificial grass FAQs in Annexure - 1 and corresponding answers - have a skim through and see if you find what you're looking for.

You have space; we have Turf to beautify that!

We comprehend that your property is a major speculation and we need our clients to realize that we are there for them to assist them with achieving the dreams that they may have for their property to Decorate it....!!

Artificial grass looks like characteristic grass in appearance as well as is predominant in surface and execution. Likewise, Artificial grass accompanies numerous advantages, from natural manageability to upgraded wellbeing and security characteristics. In contrast to live grass, the made assortment is ungracious to shape and different allergens. Designed for quick drainage, it doesn't get slippery when wet. Also, with regards to kid-accommodating yards, you will not care about your little ones tumbling across the extravagant, pardoning surface that fake grass gives.

Artificial grass is so flexible; there is a scope of items to browse for use in and around the home, occasion settings, and open air spaces, indoor games and offices too. Truth be told, synthetic grass has become the surface of choice for many professionals, elite athletics groups, both as a playing surface and for training fields.

Annexure -1

Does artificial grass fade?

No – our artificial grass is fully UV protected, meaning that it will retain its rich green colour. We also offer a 6 year warranty against fading, just for added peace of mind.

Is artificial grass safe for kids?

Artificial grass is ideal for kids. Idiya Turf grass features safe, non-slip technology, and it can even be fitted with a shock pad base for extra safety. This makes extended periods of play time much safer.

Is artificial grass safe for pets?

Absolutely. Idiya Turf has a range of products specifically designed to be skin friendly. If you're curious, give us a call and a member of our sales team would be happy to explain the benefits.

How do I clean up after my pets?

If you have artificial grass, cleaning up after pets is simple, just pick up the waste and then give the area a quick hose down. Don't worry about wee, it will drain away through the perforation.

Will my artificial grass get hot in direct sunlight?

If it's a particularly sunny day, your artificial grass could get hot. If this happens, a simple hose down will cool it off. Alternatively, you could put a blanket down – this could be preferable if you have small children.

Can I use artificial grass inside?

Of course! Our artificial grass is adaptable and can be used inside and out, regardless of whether it is a wet or dry area.

How long does it take to lay artificial grass?

As a guide: a 50 square metre garden can be laid in a single day.

Is artificial grass completely maintenance free?

Artificial grass is extremely low maintenance, like all things, it's not fully maintenance-free. It will require a brush and a sweep every now and then.

Does artificial grass flatten?

Artificial grass can become crushed by garden furniture or heavy footfall, but this is by no means permanent. To remedy this, all you have to do is brush up the pile to raise it back up again.

Phone (+91) -8800211379 ; www.idiyaturf.com

Where does rainwater go?

Idiya Turf Artificial Grass is perforated, meaning that any excess rainwater simply slips through into the soil underneath.

Will static be a problem?

This is very unlikely, it certainly won't pose a problem as frequent rainfall will ensure the garden is properly earthed.

If you have a question that you would like to ask the more about Idiya Turf Artificial Grass, get in touch with us today @+91-8800-211-379 and we would be more than happy to help.
